

Never walk alone

This deep dark place in front of your Eyes
Forbid to go there gotta say twice?
This deep dark place will burn your eyes
There is no need to pay the price
Ask me to lead you through the streets
I know the problems that they might keep
Step one step two step three and four
Make' s no difference
At all, at all, at all

You will never walk alone, as long as I live
You will never walk alone, trust me
You will never walk alone, as long as I live
You will never walk alone, believe me

After my death you think you're alone
Don't cry before my Tombstone
I will walk foggy streets of truth
There is no need to take the road
Ask me to lead you through hell
I know the problems in this hot cell
Step one step two step three and four
Four horsemen at your door

You will never walk alone, as long as I live
You will never walk alone, trust me
You will never walk alone, as long as I live
You will never walk alone, believe me

One, two, three, four - Shut this open door
Five, six, seven, eight - Before it is too late
One, two, three, four – Become a Saint or whore
Five, six, seven, eight – It's never too late

You will never walk alone, as long as I live
You will never walk alone, trust me
You will never walk alone, as long as I live
You will never walk alone, believe me
You will never walk alone, as long as I live
You will never walk alone, trust me
You will never walk alone, as long as I live
You will never walk alone, believe me
